NARIBOYINA SAI KRISHNA

Full-Stack Developer Intern | B.Tech CSE, MITS | CGPA: 7.6/10
Email: saikrishnayadav218@gmail.com | GitHub: github.com/krishna21106 | LinkedIn: in/sai-krishna-1449

EDUCATION

Madanapalle Institute of Technology and Science (MITS) - B.Tech in CSE (2022 - 2026)
Cumulative CGPA: 7.6 / 10.0 | Core: Data Structures, DBMS, Operating Systems, Networks, Web Tech

---

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), Java, SQL, HTML5, CSS3
Backend & Voice AI: Django, Django REST Framework, LiveKit Agents, Sarvam AI STT/TTS, Silero VAD
Databases: PostgreSQL (select_for_update row locking), SQLite, ACID Transactions, Relational Modeling
Frontend & Tools: Semantic HTML5, Vanilla ES6+, CSS Grid/Flexbox, Git, GitHub, Render, Postman

---

FEATURED PROJECTS

1. Zenith Events - Real-Time Ticket Booking Platform

- Implemented PostgreSQL atomic row-level locking (select_for_update) in Django to prevent double-bookings.
- 100% elimination of race conditions during ticket rushes; built interactive seat matrix; live on Render.

2. Multilingual AI Voice Tutor (LiveKit + Sarvam AI)

- Real-time voice agent using LiveKit VoicePipelineAgent, Silero VAD, Sarvam streaming STT/TTS (bulbul:v3).
- Vernacular code-mixing (Hinglish/Teluglish) with OpenAI GPT-4o-mini and active interruption handling.

3. Intelligent Meeting Scheduler

- Availability intersection engine calculating mutual clash-free intervals via Django REST endpoints.

4. EHR & Lab Management System

- Normalized PostgreSQL schemas with Django REST API endpoints and strict Role-Based Access Control (RBAC).

5. Network Monitoring System

- Python socket telemetry polling remote endpoint latency, packet loss, and service uptime diagnostics.
